

## **BG Freight Line**

The federal German government has decided to extend the national road network subject to toll for trucks (Maut) as from 1st of July 2018.

After the extension Maut will be charged for 55.000 km of federal A and B class roads compared to the earlier 15.000 km. With the increased income from the road tolls the German government intend to improve the financing of the public road network and guarantee a modern, safe and efficient traffic infrastructure in the country. You can read more [about the expanded German maut here](#).

Since the extension of the road network subject to road tolls will be as remarkable as mentioned above, it will cause significant cost increase on transport services to and from Germany. For this reason, we will unfortunately be forced to raise our road tax supplement on affected transports and rate agreements as from the beginning of July. Your sales contact at BG Freight Line will provide you with the updated agreements on request.

If something is not clear please do not hesitate to contact us.
